Detailed Action

1. Claims 1 - 12 have been examined.
2. Claims 1 - 12 are pending.
3. Claims 1 - 12 are rejected as detailed below.

Priority

The application claims benefit to 60/469767 with filing date of 5/12/2003. Accordingly the application has been examined with an effective filing date of 5/12/2003.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show **element 612 as described in the specification**. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be

labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR

1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description¹: **element 710 in figure 7**. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

1. The specification is objected to for minor informality. On [0123] it appears that the first appearance of 622 was to have meant to be 620.

¹ Appears 0129 discloses but no reference to 710

Art Unit: 2167

2. The specifications is objected to for minor informality. On [0122] it appears what is meant is that step 616 is the validation step according to figure 6 and step 618 is the registering step. In [0122], it appears to suggest that 614 and 616 validate and register respectively.

3. The specifications is objected to for minor informality. On [0131] it suggests that 720 is a validating step; however from figure 7 it appears 716 is the validating step.

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 6-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Specifically, a computer readable medium defined in the specifications [0074], consists of a carrier wave. That is, the claim is not limited to embodiments, which fall within a statutory category.

Claim Rejections - 35 USC § 102

Art Unit: 2167

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 6021443 by Bracho et. al. (hereafter Bracho).

Claim 1:

A method in a data processing system having a program the method comprising the steps of:

providing a datatype having a metadata that describes a data and a reference to the data [Col. 2 lines 22-26, routes (reference) an event to all appropriate subscribers and each subscriber is guaranteed to receive all events published on the system if and only if they match the subscription criteria specified by the subscriber (i.e. metadata that describes data). For each subscription (i.e. datatype) there is a route and a criteria.], **the data being maintained in a storage separately from the datatype and including information relating to a customer of a computer system services organization** [Col. 5 lines 26-34. Events and information relating to a customer must be stored if a publisher is off-line, a subscriber is still able to retrieve events and if a publisher can publish an event if a subscriber is off-line.]; **and**
publishing the datatype without the data, a subscriber receiving the datatype responsive to subscribing to the datatype [Abstract, publishing the subscription to appropriate subscriber. (i.e. does not publish data without a subscription.)].

Art Unit: 2167

Claim 2:

The method of claim 1, further comprising the step of: registering the datatype in a registry of known datatypes [Col. 8 line 40, subscribers subscribe to events of particular event types].

Claim 3:

The method of claim 1, further comprising the step of: saving the data and the metadata prior to publishing the datatype [Col. 5 lines 27-34, publisher is able to publish events if a subscriber is offline (i.e. saves metadata for correct subscription). Subscriber is still able to retrieve events if publisher is offline (i.e. saves data for retrieval)].

Claim 4:

The method of claim 1, further comprising the step of: receiving a request to publish the datatype [Col. 2 lines 22-26].

Claim 5:

The method of claim 1, wherein the reference is a pointer [figure 6b, subscription reference is a pointer to a subscription.].

Claim 6:

Claim 6 contains similar limitations as to claim 1, and is therefore rejected for the same reasons.

Claim 7:

Claim 7 contains similar limitations as to claim 2, and is therefore rejected for the same reasons.

Art Unit: 2167

Claim 8:

Claim 8 contains similar limitations as to claim 3, and is therefore rejected for the same reasons.

Claim 9:

Claim 9 contains similar limitations as to claim 4, and is therefore rejected for the same reasons.

Claim 10:

Claim 10 contains similar limitations as to claim 5, and is therefore rejected for the same reasons.

Claim 11:

Claim 11 contains similar limitations as to claim 1, and is therefore rejected for the same reasons.

Claim 12:

Claim 12 contains similar limitations as to claim 1, and is therefore rejected for the same reasons.
